**General**

Relay Lens **Type:**

**Physical & Mechanical Properties**

22.0 **Clear Aperture CA (mm):**

**Center Air Spacing (mm):**

3.32

Housing Diameter (mm):

30 +0.0/-0.10

Housing Length (mm):

34 ±0.2

Lens Edge Spacing at Mount (mm):

8

Image Distance (mm):

48.12

Construction:

Achromat Pair in Anodized Aluminum Housing

## Optical Properties

Substrate:

[N-SSK8 / N-SF10 / N-SSK8 / N-SF10](#)

Surface Quality:

40-20

Working f#:

f/2.70

Coating:

MgF<sub>2</sub> (400-700nm)

Coating Specification:

R<sub>avg</sub> ≤ 1.75% @ 400 - 700nm

Effective Focal Length EFL A (mm):

60.00

Effective Focal Length EFL B (mm):

60.00

Magnification:

1:1

Object Distance (mm):

48.12

Wavelength Range (nm):

400 - 700

## Product Details

- 15mm and 30mm Diameter Options
- AR Coated Lenses
- Mounted Achromatic Pairs Kits Available

TECHSPEC® Mounted Achromatic Lens Pairs combine popular TECHSPEC® Achromats into common configurations used for relay and projection applications. Packaged in slim-line aluminum housing, each pair is ready for integration into a host of OEM applications, eliminating the need to handle loose optics. 15.0mm pairs can be coupled into C-mount components using [Helicoid Barrel Accessory](#). TECHSPEC Mounted Achromatic Lens Pairs have also been oriented for optimum system performance. All lenses, 15.0mm and 30.0mm, are AR coated. Lower f# pairs may not be ideal for imaging applications depending on the performance requirements. Cylinder lenses can be incorporated into empty barrels in order to generate lines or sheets of light.
