## Product Details

- High Intensity Output up to 73,000 Lux
  - Compact Housing with T-Slot Mount
  - Full Range of Wavelengths Available
  - Optional Manual Intensity Adjustments ([#86-887](#) and [#89-555](#)) Recommended
- Advanced Illumination MicroBrite Ultra High Intensity Bar Lights offer high performance machine vision lights in a compact form factor. With a high intensity output of 73,000 Lux at a working distance of 100mm, these MicroBrite Bar Lights outperform higher cost comparable bar lights. These bar lights are available in the most common machine vision wavelengths. Advanced Illumination MicroBrite Ultra High Intensity Bar Lights are designed for applications requiring intense illumination for large area inspection. Please contact us if your application requires a MicroBrite Ultra High Intensity Bar Light with a custom length.
- Note:** Requires 24V power supply [#66-855](#). Manual Intensity Adjustment [#86-887](#) and [#89-555](#) are recommended and sold separately.

NOW**

Designed for use with the [Articulating Arm Mounting Systems](#), these 3D-printed mounts allow easy positioning of lights in brightfield or darkfield setups. The design is based on mounting illumination to 1/4-20" breadboards or into 80/20 extrusion systems, but can be adapted based on user needs. Mounts are available for ring, bar, line, and inline spot lights.
