Product Details

- English and Metric Post Adapters
- Customizable Blank Disks
- Reducing Rings

TECHSPEC® Cage System Accessories are additional components for customizing a cage system. Reducing rings are used to decrease the inner diameter of cage system plates, and feature a thru-hole that allows one of the set screws to pass from the plate, through the ring, to the optic or optical mount. For mounting directly to **posts**, post adapter disks feature M6 or ¼-20 tapped holes. 25mm diameter x 25mm length cage system post adapter disks can also be used to join a swivel plate pair. Blank disks are available to block optical paths, or to create customized mounts. Each blank disk features a 3mm diameter x 1mm deep centering hole for easy customization. Compatible with **#85-641** 30mm Side Access Plate, **#85-717** 25mm Interchangeable Optical Mount is equipped with a handle for easy insertion and removal from a cage setup.

Note: #85-719 C-Mount Adapter fits within the inner diameter of 30mm cage system plates and features both male and female threading for easy integration with **TECHSPEC C-mount components**.
