Dimensions (mm):
48 x23 x8

Note:
This board includes a Maxim driver and various FPC

connectors (4 pin and 6 pin). The board is easily driven through USB via Focuslab Software (not included). Its very small form factor enables use of this board directly with any PC-driven application with no extra hardware development.

When used with an A-39Nx lens, the jumper in ST2 must be removed to ensure optimal performance and product lifetime. Watch this [video](#), or view the Technical Information tab, for more information
