General

LFXV-100SW **Model Number:**

LED Illuminator **Type of Illumination:**

CCS **Manufacturer:**

Flat Dome Light **Geometry:**

Illumination Mode:

Constant

Physical & Mechanical Properties

143 x 143 x 10 **Dimensions (mm):**

400 **Weight (g):**

100 x 100 **Active Area (mm):**

Optical Properties

White **Color:**

Electrical

20 **Power Consumption (W):**

Hardware & Interface Connectivity

24 **Input Voltage (V):**

Power Supply:
Power Supply Required and Sold Separately.

Product Details

- Thin, Compact, and Lightweight Housing
- Available in Multiple LED Colors
- Wide Range of Sizes Including Square and Rectangular Shapes

CCS Flat Dome Lights are ideal for achieving illumination similar to Coaxial or Dome Lights in a lighter, more compact unit. While standard dome lights are good for creating a diffuse lighting environment that minimizes specular reflection, their mechanical size and imaging aperture through a small hole on top limit their use in compact applications. These flat dome lights provide the same diffuse illumination environments as a standard dome light but in a 10mm thick, flat housing with a large imaging area, greatly increasing the options for working distance, depth of focus, and field of view. CCS Flat Dome Lights can also be used at long working distances to recreate the illumination environment of a coaxial light, which is used to reduce shadowing and has minimal glare. This flexibility makes these flat dome lights suitable for a wide range of industrial and imaging applications, particularly when imaging textured, shiny, or uneven surfaces.

Technical Information

Imaging Examples Introducing various examples using unique characteristics of the Flat Dome Lights

Electronic Components Industry

Imaging Characters on a Textured Metal Surface

Workpiece: Capacitor

Conventional product: Ring Light (Red)
The surface texture makes it difficult to read the characters clearly.

New product: LFX3-25RD (Red)
Effects from the surface texture are suppressed so that the characters stand out clearly.

Electronic Components Industry

Imaging Characters on Button Batteries

Workpiece: Button battery on a metal package

Conventional product: Dome Light (Red)
The textured surface makes it impossible to read the printed characters.

New product: LFX3-100RD (Red)
Effects from the textured surface are suppressed so that the characters stand out clearly.

Packaging Industry

Imaging Shrink Film of Containers

Workpiece: Packaged plastic container

Conventional product: Ring Light (Blue)
The shrink film is poorly imaged.

New product: LFX3-100BL (Blue)
The shrink film is clearly imaged.
