Product Details

- Passive Vibration Isolation
- Lightweight, Compact Profile for Easy Portability
- Self-Leveling Design with Height Control Valves

The TMC™ High Performance Vibration Isolation System is designed to remove the unwanted effects of vibration from challenging microscopy applications. The lightweight, low-profile design weighs only 22kg, easing portability and lab integration. The TMC™ High Performance Vibration Isolation System consists of an electropolished stainless steel chassis and powder finish steel top plate. The self-leveling TMC™ High Performance Vibration Isolation System also includes height control valves for modifying the height of the platform.
