| <b>Type:</b><br>Barrel                                                                                                                                                                                     |
| <b>Typical Applications:</b><br>Bonding glass to glass                                                                                                                                                     |
| <b>Note:</b><br>Heat curing (-H suffix) adhesives are oxygen inhibited. If used on the surface of a substrate, the adhesive will need to be cured under an inert atmosphere (like nitrogen) to fully cure. |
| <b>Absorption Range (nm):</b><br>315 - 450                                                                                                                                                                 |
| <b>Bonding Type:</b><br>Glass to Glass                                                                                                                                                                     |
